PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate with hands-on experience in PHP web development, database management, and software solutions. Passionate about building efficient systems and continuously improving technical skills.

EXPERIENCE

Software Engineer Intern - Server Configuration App

Thy Web Dev Inc. | Present

- Designed and developed a server configuration dashboard using the Vultr API, automating DNS subdomain management and integrating Git-based deployment workflows to streamline server monitoring.

Freelance Developer - Website and Web System Application

Freelance | 2023 – Present

- Collaborated with clients to translate project requirements into comprehensive system designs, including database schema development and process mapping.
- Engineered scalable local web-based systems for academic and client-specific requirements, focusing on intuitive interfaces and optimized database performance.
- Developed a centralized management system for academic records, automating grading processes and data retrieval to streamline school administrative tasks.
- Architected and developed a web-based system to track internship documentation and compliance, utilizing PHP to improve administrative efficiency for student records.
- Designed a responsive school portal for School, enhancing institutional communication and accessibility for students and faculty.
- Developed a candidate and party-list information platform, prioritizing user experience and data accessibility to ensure transparent information dissemination for voters.

Mobile App Developer - Offline Organic Agriculture Learning App

Present

- Developed an offline-first Android learning app for Organic Agriculture Production using React Native, Expo, and TypeScript.
- Implemented SQLite local storage for offline access to lessons, quizzes, and educational content.
- Designed the database architecture for learning content, student progress, bookmarks, achievements, and notifications.
- Built and deployed Android applications using Expo Application Services (EAS), supporting students with limited or inconsistent internet connectivity.

Mobile App Developer - FluentFlow - A English Situational Learning App

Present

- Developing an offline-first English learning mobile application for high school students using React Native, Expo, TypeScript, and SQLite.
- Designing interactive grammar and vocabulary activities in situational contexts, including spelling exercises, fill-in-the-blank questions, and sentence-building activities.
- Implementing local data storage with SQLite to provide access to learning materials and activities without an internet connection.
- Focusing on an engaging, accessible, and reliable learning experience for students through interactive mobile-based lessons.

EDUCATION

Bachelor of Science in Information Technology - State University of Northern Negros (SUNN) - Old Sagay Campus - Brgy. Old Sagay, Saga City, Negros Occidental - 2026

With Honors - Bato National High School - Brgy. Bato, Sagay City, Negros Occidental - 2020

With Honors - Sherman Hill Integrated School - Prk. Silica, Brgy. Baviera, Sagay City, Negros Occidental - 2017

SKILLS

- Programming (PHP, JavaScript, SQL)
 - Web Development (HTML5, CSS3, Bootstrap, AJAX)
 - Mobile App Development (React Native with Expo, Typescript)
 - Frameworks & Libraries (Laravel, React, Vue.js, Tailwind, Bootstrap)
 - Database Management (MySQL / MariaDB, Firebase)
 - Tools (Git/GitHub, Composer, Postman, XAMPP, VS Code)
 - Communication Skills
 - Time Management
 - Creativity
 - Collaboration
-

ADDITIONAL INFORMATION

- **Language:** English, Filipino
- **Certification:** University Week Technovation Pitch Exhibit and Competition, Educational Tour, and OJT Completion Certificate – Thy Web Development Inc.
- **Awards/Activities:** 3rd Place Technovation Competition
